Some tips to pass your NCT;

1. Test drive your car by a Tyrestop Technician.

A Tyrestop technician will observe any unusual noises, steering problems, tyre problems and may be able to save you the cost of a retest. Some checks are free and there is a charge for a more elaborate check.

2. Clean the car inside and out

Clean your car inside and out and underneath also. Ensure that the lights, windows, mirrors and registration plates in particular are clear and undamaged. Remove all personal belongings in the car and also the boot. Remove the child's seat otherwise the tester is required to check fitment. Do not have any item hanging from your review mirror. Remove the hubcaps to allow all wheel nuts be viewed.

3. Check your lights & wipers

Incorrect Head light focus is a fail, so have it checked if possible. Get some help to insure all lights are in good working order and clean, don't forget the number plate light.

Check the headlight and low beam, indicators, fog lights, parking lights, number plate lights and brake lights. Check the wipers to ensure they work properly and clear the screen. Wipers are cheap to replace in comparison to a retest.

4. Check all dash lights

Start the engine and let run, view any warning lights illuminated in the dashboard. If there are, bring the car to a Tyrestop mechanic to use a diagnostic tool to address the problem and advise what you need to do.

5. Top up fluids

Check that all the fluids are at required levels. Call to any Tyrestop depot and this can be checked for you. Fluids include engine oil, engine coolant, , power steering fluid and brake fluid windscreen wash.

6. Inspect your tyres

Tyres are a critical issue and an easy fail. Call to Tyrestop and get the pressure, correct size, speed rating, load rating, irregular wear, same axle pattern, no cracks or bulges and obviously tread dept.

This is a fast simple check for any Tyrestop depots to carry out free of charge.

7. The paperwork

Bring all paperwork relating to your car and also your personal identification.
